

## COLREGS PRO -smartphone Application-

Senior Lecturer in Nautical Science at the centre of the French National Maritime College (ENSM) in France, Marseille, where I teach manoeuvring, navigation and COLREGs for Merchant marine students, I created a smartphone App to review and learn the Colregs. My application for smartphones which is addressed primarily to the professional mariners. Its name is "Colregs Pro".

I will be very grateful if you could publish this news in your magazine and newsletter:

Description "Colregs Pro"

Steering and sailing rules - Colregs - for all sailing and power-driven vessels.

This App is aimed at both students at maritime training schools beginning to train in navigation, as well as experienced seafarers who wish to further their own skills in these mandatory regulations. In all flashcards, professional mariners will find references to international IMO regulations (Colregs 72, IALA, STCW).

With 101 flashcards, this app allows learning, reviewing effectively and in a progressive way all the steering and sailing Rules to prevent the risks of collision.

There are 5 main sections to this app:

1. Buoyage
2. Visual signals
3. Lights and shapes
4. Sound and light signals
5. Steering and sailing rules

There are 3 ways to revise Colregs:

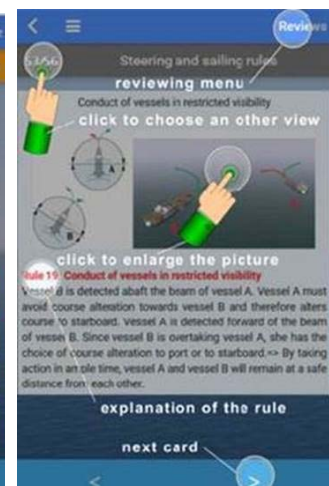

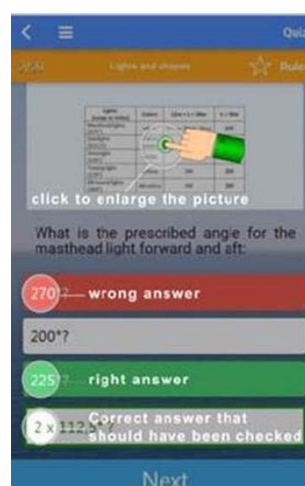

1. Revision mode: all cards are read one after the other
2. Quiz mode: the learner trains by answering questions
3. Challenge mode: allows evaluating with the cards whose answer to the quiz has been false

Steering and sailing Rules are available at any time

A Statistics menu allows evaluating the learner on each test

No Internet connection required after application downloaded

App is in English and French language.

You can see an explication with more details on You tube “Colregs flashcards”:
